Description:

A Computer Science and Engineering (CSE) engineer is a professional who applies the principles of computer science and electrical engineering to design, develop, and maintain computer systems and software. They are skilled in programming languages, software development, algorithms, data structures, and hardware architecture. CSE engineers work on a wide range of technologies, including operating systems, databases, networks, and cybersecurity. They play a crucial role in advancing technology by creating innovative solutions for complex problems in various industries.

Skills:

Algorithms, Data Structures, Programming Languages (e.g., Python, C++, Java), Software Development, Database Management, Operating Systems, Network Security, Machine Learning, Web Development, Cloud Computing.

Experiences:

Year: 09/2015 to 05/2019

Software Engineer

Luna Software, New York

- Investigation, design, and implement scalable applications for data identification, analysis, retrieval, and indexing.

- Software design and development while remaining concentrate on client needs.

- Estimate interface between hardware and software.

Year: 09/2014 to 05/2015

Junior Software Engineer

AdsPro Software, New York

- Consulted regularly with customers on project status, proposals and technical issues.

- Transformed existing software to correct errors, upgrade interfaces, and improve efficiency.

Education:

Year: 2024

North South University

Computer Science & Engineering

CGPA: 3.99

Projects:

Eco Mart

Web app

- Used HTML, CSS, PHP, JavaScript, MySQL.

- It have admin panal, and employee panel, and basic user panel.
